Re: Notification of **third community meeting for offsetting improvements**

Dear Neighbor,

This is to invite you join us at the third community meeting to discuss the community's ideas regarding potential offsetting improvements to public streets as a result of the new *Transportation Impact Policy*.

When: **Thursday, October 5, 2006**

Time: **6:30 pm to 8:30 pm**

Where: **Northside Community Center**

Address: **488 North Sixth Street** at Empire Street, in San José

As you may already know, the new *Transportation Impact Policy*, adopted by the City Council in June of 2005, establishes a process for new developments that have traffic impacts to certain intersections that can no longer be widened, called Protected Intersections, to install improvements, called "offsetting improvements", for non-automobile means of transportation (such as pedestrian, bicycle, and transit). The offsetting improvements would be constructed instead of widening streets or otherwise constructing improvements to traffic flow at the Protected Intersections. The *Policy* identifies certain areas, called Community Improvement Zones, as the areas that would be affected by traffic impacts to Protected Intersections, and should receive benefit of the identified offsetting improvements.

City staff is looking for input from community and stakeholder groups within the Jackson-Taylor Community Improvement Zone to create a list of potential offsetting improvements that would be installed by new developments that have impacts to protected intersections.

Please feel free to contact me at rodrigo.orduna@sanjoseca.gov, or at (408) 535-7890, if you have any questions or comments regarding this meeting.

Yours truly,

Rodrigo Orduña, AICP
